  przesuń o krok / 2 kroków
  obróć o 90 stopni
  przesuń o krok / 2 kroków
  przyłóż pisak
  powtórz 4 razy
    obróć o 90 stopni
    przesuń o krok kroków
  zmień krok o 10
```

The image shows a Scratch script for drawing a square. It starts with a 'when clicked' event block, followed by setting the 'step' variable to 4. A 'repeat until' loop is used to draw the square's perimeter. Inside the loop, the pen is lifted, the turtle moves to the origin (0,0), moves forward by half the step size, turns 90 degrees, moves forward by half the step size again, and then the pen is lowered. A 'repeat' loop inside the 'repeat until' loop performs four 90-degree turns and moves the turtle forward by the full step size. Finally, the step size is increased by 10.
